01

EXECUTIVE SUMMARY

Jones Excavating Co. has spent seven decades building a reputation for taking on the excavation work others won't touch — deep foundations, shoring, complex site drilling. Callus Fabrication, the sister company, brings the same hands-on standard to mobile welding and custom steel fabrication across the Wasatch Front. Both brands have real equity. Neither currently has a visual identity, web presence, or digital marketing strategy that reflects the quality of the work.

This proposal covers the **full-stack digital engagement**: branding, web, SEO, local search, and social media — delivered as two parallel tracks, one for each company. The result is a pair of distinct brand systems, two marketing sites, a local SEO foundation for both, and a social content strategy that keeps each brand visible to the customers it actually serves.

Two brands. Full-stack digital. One project.

Jones keeps its heritage mark — sharpened and modernized. Callus gets a fresh identity of its own. Both get mobile-first websites, Google Business Profile optimization, local keyword strategy, citation building, and content direction. One coordinated engagement, built to generate real pipeline for both companies.

What This Proposal Covers

- Jones Brand Refresh** Wordmark refinement, palette system, typography, voice guide — rooted in 70-year equity.
- Callus Brand Identity** Full brand identity from scratch: logo, palette, typography, voice, and brand standards.
- Dual Marketing Sites** Two complete sites, launched together. Mobile-first, CMS-powered, PageSpeed 90+ target.
- SEO & Local Search** Local SEO for both brands: GBP optimization, schema markup, keyword strategy, citation building, monthly reporting.

Social Media & Content

Platform strategy, content pillars, posting cadence, Google Business posts for both companies.

Timeline & Investment

Phased schedule with updated all-in pricing — brand, web, and digital — plus monthly SEO retainer options.

02

APPROACH — TWO BRANDS, ONE PROJECT

The central question: **how separate should Jones and Callus feel?** We reviewed three directions — one merged brand, a parent/sibling visual system, and two independent identities. After weighing the customer overlap (low), market positioning (distinct), and future-flexibility (Callus may outgrow a sibling system), the recommendation is **distinct identities, coordinated project**. The same logic applies to SEO and social: two separate GBP listings, two distinct keyword targets, two separate social presences — but built in parallel with shared production efficiency.

DIMENSION	JONES EXCAVATING	CALLUS FABRICATION
Market	Commercial GCs, public agencies, developers across UT/WY/ID	Commercial contractors on the Wasatch Front, public works
Trade	Excavation, deep foundations, shoring, drilling, site work	Mobile welding, custom fabrication, structural steel
History	70+ years. Known name. Heritage equity.	15+ years. Newer brand. Room to build identity.
Brand voice	Direct. Confident. Grounded.	Craftsman. Honest. Earned.
Visual feel	Industrial-modern. Dark. Orange accent.	Heritage-craftsman. Warm. Rust accent.
Typography	Barlow Condensed · Inter	Roboto Slab · Oswald · Inter
SEO focus	Local Utah/WY/ID; deep foundation, excavation terms	Wasatch Front; mobile welding, custom fab terms
Social platform	Facebook primary — local GC network, community trust	Instagram primary — visual craft, project portfolio

Why not a sibling system?

A shared visual language was considered and ruled out — it makes Callus feel like a Jones sub-line, which under-indexes Callus' own customer base. Distinct brands give Callus room to grow its own reputation and its own search presence. A small shared cue — "proudly part of the Jones Excavating family" in the footer — signals the tie without subordinating the brand or competing for the same search terms.

03

JONES EXCAVATING — BRAND REFRESH

BRAND

Jones Excavating Co.

Commercial deep foundations and complex site work across Utah, Wyoming, and Idaho. Seven decades of heritage.

"Built for the Hard Jobs."

POSITIONING

The thesis

The Jones logo has real regional equity — the blocky "JONES" wordmark, the inline stripes, the excavator-bucket J mark. We refine, not replace: tighten the geometry, preserve the inline typography, modernize the system around it. The tagline "Built for the Hard Jobs" captures what Jones already is — and gives sales, marketing, and recruiting one consistent line to rally around.

COLOR SYSTEM

PRIMARY	CARDS/UI	ACCENT	HIGHLIGHT	LIGHT BG	BODY TEXT
Jet Black	Charcoal	Signal Orange	Amber	Off-White	Steel Gray
0X0C0E10	0X161A1D	0XE8621A	0XE8A21A	0XF4F2EE	0X8A8880

TYPOGRAPHY

Headlines & Display

Barlow Condensed — weights 700–900.
Industrial, condensed, confident. All section titles, hero copy, stats, wordmark.

Body & UI

Inter — weights 400–700.
Modern, highly legible. Body copy, navigation, forms, proposals.

LOGO DIRECTION

- Preserve the excavator-bucket J mark — same geometry, cleaner edges
- Preserve the inline-stripe "JONES" typography — signature, recognizable, heritage
- Two approved concepts: **Monochrome refresh** (black/white, classic) and **Signal Orange** (orange stripes + contractor bar)
- Logo works at every scale: hard-hat stickers, equipment decals, signage, digital, proposal cover
- Delivered in SVG, PNG (multi-size), and print-ready PDF formats

VOICE

TONE	WHAT IT MEANS IN PRACTICE
Direct	No fluff. Say what you do and how well you do it. No corporate jargon.
Confident	Speak from expertise. Don't hedge. "We handle the jobs others won't" — not "we try to..."
Grounded	Real language of the industry. Acknowledge the difficulty of the work — don't sanitize it.

WEBSITE

Dark, industrial, orange-accented. Mobile-first (GC superintendents review subs on phones). Phone number in header on every page. Quote form on homepage. Real project photography with specs, stats, and ADSC recognition front and center. Target PageSpeed 90+ on mobile. A homepage prototype has been built and is available for review at jonesexcavating.com (staged).

04

CALLUS FABRICATION — BRAND DIRECTION

BRAND

Callus Fabrication

Mobile welding, custom fabrication, and structural steel for commercial contractors across the Wasatch Front.

"It's all in the name."

POSITIONING

The thesis — "Hands & Fire"

"Callus" is a gift of a name — hands hardened by work, the literal badge of the trade. Plus a ready-made CTA: Call us. The brand leans into both meanings. The system is warmer and more handmade than Jones: rust and gunmetal, slab serif typography, a shield mark built from a hammer and sparks. It's the opposite of a slick corporate rebrand — it reads as a working shop with decades of earned expertise.

COLOR SYSTEM

PRIMARY	CARDS/UI	ACCENT	HIGHLIGHT	LIGHT BG	BODY TEXT
Ink 0X1A1815	Gunmetal 0X2E2A26	Rust 0XB64A24	Brass 0XC9A66B	Cream 0XEFE7D6	Olive 0X5C5A42

TYPOGRAPHY

Headlines & Display

Roboto Slab — weights 600–700, italic for emphasis.
Heritage, handmade, solid. Headlines, wordmark, shop signage.

Accents & UI

Oswald (labels, captions) & **Inter** (body).
Oswald gives industrial signage feel; Inter keeps forms & paragraphs readable.

LOGO DIRECTION

- Shield-mark silhouette — refreshed from the current Callus mark, keeping the "trade badge" read
- Hammer + sparks inside the shield — visual shorthand for fabrication, hand work, heat
- "EST. 2009" banner across the top — plants the heritage flag immediately
- Wordmark in Roboto Slab with a rust period — "Callus." — and a small italic subtitle: — *Fabrication* —
- Tagline lockup: "It's all in the name."
- Delivered in SVG, PNG (multi-size), print-ready PDF, plus single-color versions for decals, stickers, and stamping onto steel

VOICE

tone	what it means in practice
Craftsman	Respect for the trade. Technical accuracy. Proud of the work — not precious about it.
Honest	Quote straight. Tell you if a job isn't in our wheelhouse. Back the warranty in person.
Earned	No boasting. Let the weld bead speak. Occasional shop humor, never corporate slick.

WEBSITE

Warm cream background, rust and brass accents, slab serif headlines. Sections: hero with shield mark, capabilities grid (Mobile Welding / Custom Fab / Structural / Public Works), "The Shop" story, recent work gallery, "4 Reasons GCs Keep Calling Back," and a big "It's all in the name" CTA with the phone number oversized. Footer carries a small sister-brand acknowledgment. A working mockup is available at [callusfabrication.com](#) (staged).

05

WEB STRATEGY

Two sites, built in parallel. Each reflects its brand. Both are built on the same technical foundation — mobile-first, CMS-powered, fast, and maintainable by the client without a developer.

Jones Excavating Co.

6–8 pages. CMS (WordPress or Webflow).
Contact/quote form. Equipment/project gallery.
ADSC recognition, stats, and project specs front and center. Phone number pinned in header on every page. PageSpeed 90+ target on mobile.

Pages

- Home — hero, stats, services overview, trust bar
- Services — excavation, deep foundations, shoring, drilling
- Projects — photo/spec gallery with project detail pages
- About — history, team, ADSC, values
- Equipment — fleet list, capabilities
- Contact — quote form, phone, map

Callus Fabrication

5–6 pages. CMS. Services grid, work gallery, "4 Reasons" trust section. Shop story, phone number prominent. Warm brand palette applied site-wide. PageSpeed 90+ mobile target.

Pages

- Home — hero with shield mark, capabilities, CTA
- Services — mobile welding, custom fab, structural, public works
- Work — project gallery with detail pages
- Shop — about the company, team, shop story
- Contact — quote form, phone, map

CMS RECOMMENDATION

Webflow is recommended for both sites — no-plugin security surface, visual editor, built-in hosting on a global CDN, and easy content updates for staff without developer access. WordPress is an acceptable alternative if the client has existing WP infrastructure. Either way: no page builders, no plugin bloat, hand-built templates for performance.

TECHNICAL STANDARDS

- PageSpeed / Core Web Vitals: 90+ on mobile for both sites (LCP < 2.5s, CLS < 0.1)
- HTTPS enforced; security headers configured (CSP, HSTS, X-Frame-Options)
- Structured data: LocalBusiness schema on contact pages, BreadcrumbList on interior pages
- XML sitemap submitted to Google Search Console on launch day
- robots.txt configured; staging environments blocked from indexing
- Cross-browser QA: Chrome, Safari, Firefox, Edge — desktop and mobile

- Accessibility: WCAG 2.1 AA compliance target — keyboard nav, alt text, contrast ratios
- Analytics: GA4 + Google Search Console on both sites from day one

HOSTING

Webflow hosting (Enterprise or CMS tier) covers both sites. Includes global CDN, SSL, daily backups, and 99.9% uptime SLA. If WordPress is chosen: WP Engine or Kinsta managed hosting recommended — both include staging environments, automatic backups, and CDN.

SEO & LOCAL SEARCH

Local search is where these companies get found.

Most customers for Jones and Callus start with a Google search — often from a job site on a phone. "Excavating contractor Salt Lake City." "Mobile welder West Jordan Utah." If neither company shows up in the local pack or the first organic page, they're invisible to that search. This chapter covers the foundation for fixing that.

GOOGLE BUSINESS PROFILE OPTIMIZATION

Two separate GBP listings — one for each company. GBP is the highest-leverage local SEO asset for service contractors. Both listings will be fully optimized as part of setup.

- Complete all fields: business name, category, service areas (county + city level), hours, phone, website
- Primary category: **Excavating Contractor** (Jones) | **Welding Supply Store** or **Metal Fabricator** (Callus)
- Add all applicable secondary categories for broader search surface
- Upload 20+ photos at launch: equipment, job sites, team, shop interior, finished work
- Enable Q&A section — seed with 5–8 common customer questions and answers
- Set up Google Business Posts: weekly posts using project photos, before/after, seasonal content
- Review solicitation strategy — template responses, timing guidance for both companies

SCHEMA MARKUP

Structured data tells search engines exactly what each page is about. Both sites will implement schema on relevant pages at launch.

SCHEMA TYPE	APPLIED TO	BENEFIT
LocalBusiness	Contact / homepage	Enables rich results: address, phone, hours in SERP
GeneralContractor	Services page (Jones)	Tells Google this is a licensed contractor

SCHEMA TYPE	APPLIED TO	BENEFIT
HomeAndConstructionBusiness	Services page (Callus)	Broader contractor schema for fab/welding
BreadcrumbList	All interior pages	Clean breadcrumb trail in SERP snippets
FAQPage	Service pages (both)	FAQ rich results expand SERP real estate
ImageObject	Project galleries	Image search visibility for project photos

KEYWORD STRATEGY

Target keywords are grouped by intent: informational (how do I find a contractor), transactional (contractor + location), and navigational (brand name searches). Jones keywords focus on the Wasatch Front and Mountain West for heavy commercial work. Callus keywords focus on the Wasatch Front for trade and contractor audiences.

JONES EXCAVATING — KEYWORDS	CALLUS FABRICATION — KEYWORDS
<i>excavating contractor Utah</i>	<i>mobile welding Utah</i>
<i>excavation company Salt Lake City</i>	<i>mobile welder Salt Lake City</i>
<i>foundation drilling SLC</i>	<i>custom fabrication West Jordan</i>
<i>deep foundation contractor Utah</i>	<i>custom steel fabrication Utah</i>
<i>site excavation contractor Wasatch Front</i>	<i>structural steel fabrication SLC</i>
<i>excavating company West Jordan Utah</i>	<i>welding contractor Wasatch Front</i>
<i>shoring contractor Salt Lake</i>	<i>mobile welder West Jordan Utah</i>
<i>caisson drilling Utah</i>	<i>custom metal fabrication Utah</i>
<i>commercial excavation Utah</i>	<i>steel fabricator Salt Lake</i>
<i>ADSC certified driller Utah</i>	<i>commercial welding contractor Utah</i>
<i>excavation contractor Wyoming</i>	<i>on-site welding Utah</i>
<i>excavation contractor Idaho</i>	<i>portable welding service SLC</i>
<i>utility excavation contractor SLC</i>	<i>fabrication shop West Jordan</i>

JONES EXCAVATING — KEYWORDS	CALLUS FABRICATION — KEYWORDS
<i>trenching contractor Utah</i>	<i>steel fabrication contractor Utah</i>

CITATION BUILDING

Citations — consistent business listings across the web — are a core local ranking factor. Both companies will have their NAP (Name, Address, Phone) submitted and verified across the major contractor and business directories.

- **General:** Google Business Profile, Apple Maps, Bing Places, Yelp, Yellow Pages
- **Contractor-specific:** Angi (formerly Angie's List), HomeAdvisor, Houzz, BuildZoom, Contractors.com
- **Trade associations:** ADSC member listing (Jones), AWS directory (Callus)
- **Local:** Utah Better Business Bureau, local chambers of commerce (Salt Lake, West Jordan)
- **Data aggregators:** Foursquare (Data Axle), Neustar Localeze — feeds hundreds of downstream directories
- Ongoing citation audit — fix inconsistent NAP before building new citations

ON-PAGE SEO

Every page on both sites will be built with on-page SEO as a design constraint, not an afterthought applied after launch.

ELEMENT	JONES EXAMPLE	CALLUS EXAMPLE
Title tag	Jones Excavating Co. Excavation Contractor Utah	Callus Fabrication Mobile Welding & Custom Fab Utah
Meta description	Utah's most trusted excavation contractor for deep foundations, shoring & site work. ADSC-certified. 70+ years.	Custom steel fabrication and mobile welding for contractors across the Wasatch Front. 15+ years. Call us.
H1 (homepage)	"Built for the Hard Jobs"	"It's All in the Name"
Service page H1	"Deep Foundation Drilling — Utah & Mountain West"	"Mobile Welding — Wasatch Front & Salt Lake Valley"
Image alt text	Jones excavator on deep foundation job, Salt Lake City	Callus welder on structural beam, West Jordan Utah
Internal linking	Services → Project gallery by trade → Contact	Services → Work gallery by service → Contact

TECHNICAL SEO

Technical SEO is handled at build time — these are not post-launch cleanup items. Both sites launch with a full technical foundation.

- **Page speed:** PageSpeed 90+ mobile. Images in WebP/AVIF, lazy-loaded. Minimal JS. No render-blocking resources.
- **Core Web Vitals:** LCP < 2.5s, FID < 100ms, CLS < 0.1 — measured and fixed before launch
- **Crawlability:** clean URL structure (/services/excavation/, not /?p=42), canonical tags, no duplicate content
- **XML sitemap:** auto-generated, submitted to Google Search Console and Bing Webmaster Tools on launch day
- **robots.txt:** staging environment blocked; production configured to allow all search engines
- **HTTPS:** SSL enforced site-wide, HSTS header configured, no mixed-content warnings
- **Mobile-first indexing:** responsive design, no separate mobile URLs, viewport meta tag on every page
- **404 handling:** custom 404 pages with navigation; 301 redirects for any legacy URLs

MONTHLY SEO REPORTING

Monthly reports cover both companies. Delivered by the 5th of each month.

- Google Search Console: impressions, clicks, average position, top queries by brand
- GBP insights: searches, views, calls, direction requests, review count and average rating
- Ranking report: tracked keyword positions for all target terms (both sites)
- Traffic report: organic sessions, new vs. returning, top landing pages, conversion events
- Citation and backlink audit: new citations added, any NAP inconsistencies flagged
- Recommendations: one or two priority actions for the month ahead

07

SOCIAL MEDIA & CONTENT

Neither Jones nor Callus needs a huge social media presence — but both benefit from a consistent, on-brand one. The goal is not followers; it's trust signals and project visibility for the GCs and developers who look up a company before calling.

Jones Excavating Co.

Primary platform: Facebook.

Jones' customers — GC project managers, public agency PMs, developers — skew toward Facebook for professional local credibility checks. A well-maintained Facebook page with project photos and reviews reads as "established, real company."

Content Pillars

- Project photos — equipment in the field, job site progress
- Behind the scenes — crew, equipment yard, maintenance days
- Stats & milestones — "Completed 80th deep foundation"
- Heritage — throwback photos, company history content
- Community — local events, safety, industry news

Posting Cadence

2–3 posts/week. No posting for the sake of posting — every post should have a photo.

Callus Fabrication

Primary platform: Instagram.

Callus' work is inherently visual — welds, fabricated pieces, finished steel. Instagram's visual-first format is the right home for that work. Contractors who vet subs frequently check Instagram for portfolio evidence.

Content Pillars

- Finished work — clean shots of completed fabrication and welds
- Process — in-progress shots, arc glow, fit-up photos
- Shop life — behind the scenes, equipment, the team
- Educational — quick tips on welding processes, steel types
- Before/after — transformation shots of custom fabrications

Posting Cadence

3–4 posts/week. Reels (short video) 1–2x/month to boost reach.

GOOGLE BUSINESS POSTS

GBP posts appear directly in Google Search results and Maps — they're often more valuable than social posts for local service contractors because they show up when someone is already searching for you. Both listings will use weekly GBP posts as part of the SEO retainer. Post types: project photos, seasonal offers (e.g. spring site prep), team spotlights, and award/certification announcements.

CONTENT PRODUCTION NOTES

- We produce the first 3 months of content — copy, captions, hashtag sets — as part of setup
- Client provides project photos (guidance document on what to shoot and how will be delivered)
- Monthly content calendar template — client or team can maintain independently after setup
- Optional: add ongoing social management to the monthly retainer (available as add-on)

08

TIMELINE & INVESTMENT

Five phases. Branding lands first — both companies can start using new identity inside three weeks — then web development carries through to a coordinated dual launch, followed by SEO setup and social media launch.

P
H.
1

Discovery & Strategy

WEEK 1–2

- Stakeholder interviews with Jones and Callus leadership
- Customer / market positioning for both brands
- Finalize voice guides and brand architecture
- Keyword research: Jones and Callus target term sets
- Competitive review: peers, sister-brand playbooks, local SEO landscape

P
H.
2

Brand Systems

WEEK 3–5

- Jones logo refresh — 2 finalized concepts delivered
- Callus identity — logo, palette, typography, guidelines
- Brand standards PDFs for both companies
- Asset packages: SVG, PNG, PDF (print), single-color versions
- Client approval checkpoint — both brands locked before web starts

P
H.
3

Web Design & Build

WEEK 6–11

- Jones site: 6–8 pages, CMS, forms, analytics
- Callus site: 5–6 pages, CMS, forms, analytics
- On-page SEO: title tags, meta, H-tag structure, schema markup on all pages
- Mobile-first design, PageSpeed 90+ target on both
- Cross-browser QA and accessibility checks

P H. 4	Launch & SEO Setup	WEEK 12–13	• DNS cutover, dual launch — both sites go live together • GBP optimization: both listings fully built out with photos and posts • Citation building: submissions to 30+ directories for each company • Analytics, Search Console, and GBP Insights connected • Post-launch 2-week support window
P H. 5	Digital Ongoing (Monthly)	MONTH 2+	• Monthly SEO report: rankings, traffic, GBP insights, citations • Weekly GBP posts for both companies • Keyword rank tracking — all target terms, both sites • Citation monitoring and NAP consistency checks • Quarterly SEO review call + strategy update

ONE-TIME INVESTMENT

Jones Brand Refresh	Logo refinement, color/type system, voice guide, brand PDF, asset pack	\$3,500 – \$5,500
Jones Website	6–8 pages, CMS, forms, analytics, SEO foundation, mobile-first	\$8,000 – \$12,000
Callus Brand Identity	Full identity from scratch, shield mark, palette, type, voice, asset pack	\$4,500 – \$6,500
Callus Website	5–6 pages, CMS, forms, analytics, SEO foundation, mobile-first	\$6,500 – \$10,000
SEO Setup (both sites)	GBP optimization, schema markup, citation building, Search Console setup, on-page SEO audit	\$2,500 – \$3,500

Social Media Setup	Platform profiles, first 3 months of content, content calendar template, GBP post templates	\$1,500 – \$2,500
ALL-IN PROJECT TOTAL	\$26,500 – \$40,000	Both brands, both sites, SEO setup, social setup — bundle pricing

MONTHLY RETAINER (AFTER LAUNCH)

Monthly SEO Retainer	Rankings, GBP posts, citation monitoring, monthly report — both sites	\$800 – \$1,200/mo
----------------------	---	--------------------

Bundle discount of ~10% applied to all-in engagement vs. running tracks independently. Individual tracks can be scoped separately if preferred. Monthly retainer can be added at any time after launch — recommended to start in Month 2.

09

NEXT STEPS

Two working site mockups (Jones and Callus), a brand-concepts deck, and a preview of the SEO keyword strategy are already built and viewable. From here, the path is short.

1. Review

Scroll the brand concepts deck and both homepage mockups. Note what lands, what doesn't, what feels off. Review the keyword lists and flag any terms that need adjusting.

2. Approve

Confirm brand direction for each company (Jones refresh path, Callus "Hands & Fire" direction), and green-light scope. Sign-off on keyword strategy and SEO target cities.

3. Kickoff

Half-day brand workshop with Jones and Callus leadership. We lock voice, positioning, keyword targets, and open questions before design begins.

4. Ship

Brand systems delivered in three weeks. Full dual-site launch twelve weeks from kickoff. SEO and social setup complete by end of Week 13. Monthly reporting starts Month 2.

Ready when you are.

Links to the live mockups are in the cover email. The fastest next move is a 30-minute call to walk through what you like in each direction and where you want to push back — we'll take that feedback straight into the workshop agenda.

LIVE DELIVERABLES

- Brand concepts deck — **brand_concepts.html**
- Jones homepage mockup — **index.html**
- Callus homepage mockup — **callus.html**
- Agency proposal landing page — **outputs/landing.html**

Schedule a 30-minute walkthrough to react to each concept and we'll shape the workshop agenda around your notes.
